## Senior Software Engineer (Java/J2EE)

ESAC, Inc., a global provider of data management, informatics research and healthcare IT solutions to government, academic and research institutions is looking for a Senior Software Engineer who can contribute to our several high profile projects in the healthcare domain. This position plays a critical role in supporting ESAC clients at the Department of Health and Human Resources and its various divisions. The Senior Software Engineer will use cutting edge technologies in a very aggressive, fast-paced environment providing technical capabilities in an agile environment. The work location will be at our client site in DC and/or at our offices in Rockville, MD.

### Principal Responsibilities:

1. Design, develop and test Java applications in the health IT domain.
2. Manage the build and automated testing infrastructure
3. Develop and maintain build and release documentation
4. Work with customers/clients to support their project technical needs
5. Work on other projects as needed in a startup environment
6. Work in a collaborative, agile environment

### Qualifications:

- 6+ years developing Java backend, preferably from a health IT background
- Senior-level skills with Java, J2EE and associated frameworks (Spring, Struts, Hibernate, etc)
- Experience with any application server, preferably Glassfish or JBoss
- Must have good understanding and implementation experience with SOA
- Experience working on Web Services/SOAP UI applications
- Experience using Subversion, Eclipse/NetBeans, Hudson, JUNIT, Ant, Maven and similar developer tools
- Solid experience with Agile development methodologies
- Experience with Oracle, MySQL and other databases
- Strong interpersonal skills and collaborative approach to problem solving
- Bachelors in Computer Science or commensurate degree required
- Masters in Computer Science or commensurate desirable

### Skills:

- Java, J2EE, Web Service/SOAP UI, Groovy, Glassfish/JBoss, XML/XSD/XLST, Ajax, Struts, JSP, UML Modeling, Subversion, Eclipse/NetBeans, Ruby, Oracle/MySQL, Maven, Hudson, JUnit/Fitness
